

REMANUFACTURED INJECTOR DRIVE MODULE FOR POWER STROKE ENGINES

Another piece of the HEUI drive-in repair market puzzle is now available. Injector Drive Modules (IDM) are available for all Ford 7.3L Power Stroke engines.

Reliability

The IDMs are remanufactured in a ISO14011/TS16949 certified facility. Each unit is serial numbered for accountability from your customer back to the factory and comes equipped with the DIPACO one-year warranty for outstanding reliability.

Performance

Each remanufactured IDM is dismantled and all electronic components are tested using proprietary equipment and procedures. Faulty components are replaced and units are 100% tested.

Efficiency

The IDMs come in two part numbers which cover the entire range of Ford 7.3L Power Stroke engines. DPS110 is for use in 1994-1/2 through 1998 models while DPS120 is used in 1999 through 2003 models. The great pricing from DIPACO allows you another way to compete with Ford dealers while increasing your profit margin.

Convenience

While there is a core fee attached to these units, you have 6 months to return your cores and still receive credit. This allows you plenty of time to return cores and save even more money. Also, DIPACO has parts and kits for rebuilding and installing HEUI injectors.

DPS110

Replaces the following IDMs:

F5TF-12B599-AB
F6TF-12B599-AA
F7TF-12B599-AA
F7TF-12B599-AB
F7TF-12B599-AC
F7TF-12B599-AD
F7TF-12B599-AE
F7TF-12B599-AF

DPS120

Replaces the following IDMs:

2C24-12B599-AA
2C24-12B599-AB
XC3F-12B599-AA
XC3F-12B599-AB
XC3F-12B599-AC
XC3F-12B599-AD
F7TF-12B599-AG
